The monomers have no migration limits.

The products contain an additive with migration restriction:

- Octadecyl 3-(3,5-di-tert-butyl-4-hydroxyphenyl)propionate
pm/ref 68320, SML=6mg/kg.

Migration testing has to be performed by the end-user on the final item, according to the expected use conditions, to verify the compliance with the applicable statutory limits. The overall migration test is particularly critical for fatty food.

The products do not contain substances authorized as flavourings, nor as direct food additives with restrictions in the applicable EC directives.

We confirm that our mentioned products are manufactured using the good manufacturing practices recommended by Regulation (EC) 2023/2006 and that our quality management system ensure the traceability required by the Regulation (EC) No 1935/2004.

We point out that it is a responsibility of the end users to ensure that materials and articles, manufactured with good manufacturing practice (Regulation (EC) 2023/2006), under the normal or foreseeable conditions of use, do not transfer their constituents to foodstuffs in quantities which could endanger human health and/or bring unacceptable changes in the composition of the foodstuffs or a deterioration in the organoleptic properties (Regulation (EC) No 1935/2004).
