

MJ Addistat 28

January 2016

For the ingredients of MJ Addistat 28 we have confirmations of our suppliers that the ingredients complies with the following regulations (including all complements and in its actual valid versions):

- regulation (EC) No 1935/2004
- Commission Regulation (EU) No 10/2011 on 14.01.2011 (repeal Commission Directive 2002/72/EC of 6 August 2002 on plastic materials and articles intended to come into contact with foodstuffs)

No restrictions or specific migration limits (SML) are stated.

The ingredients of the product mentioned above are in agreement with the Code of Federal Regulations Title 21 §184.1 and therefore MJ Addistat 28 is permitted as an indirect additive to food.

If MJ Additive intends to modify the above listed raw materials, the production process and / or production location to the extent that it can affect the composition purity standard or properties of the product MJ Additive will timely inform the customer.
