

DECLARATION

PRODUCT(s):

11584901 POLYWHITE L 8160

COMMISSION REGULATION (EC) No 1895/2005 of 18 November 2005 on the restriction of use of certain epoxy derivatives in materials and articles intended to come into contact with food replaces COMMISSION DIRECTIVE 2002/16/EC of 20 February 2002

Regarding the use and/or presence of 2,2-bis (4-hydroxyphenyl) propane-bis (2,3-epoxypropyl) ether ('BADGE'), bis (hydroxyphenyl) methane bis (2,3-epoxypropyl) ethers ('BFDGE ') and novolac glycidyl ethers ('NOGE') in materials and articles intended to come into contact with foodstuffs.

*We hereby declare that we do not use intentionally **epoxy derivatives**, BADGE, BFDGE or NOGE, Bisphenol A, Bisphenol B, Bisphenol S or Bisphenol F during the manufacturing of the above mentioned products and therefore are not expected to be found.*

Polycarbonate, epoxy resins, BPA are not used in our production/products (PE - PP or PS-masterbatches) or ingredients.

Analitical tests on BPA are not relevant and not a part of our quality control.

This concerns only the composition of the above mentioned products and does not guarantee the compliance of final articles made of these products.

A. SCHULMAN - Regulatory Affair

For Information only:

Bisphenol A (BPA) is a chemical that is mainly used in polycarbonate, a type of transparent, rigid plastic.

Polycarbonate is used to make food containers, such as returnable beverage bottles, infant feeding (baby) bottles, tableware (plates and mugs) and storage containers.

Residues of BPA are also present in epoxy resins used to make protective coatings and linings for food and beverage cans and vats.

This statement is based on our current level of knowledge and covers commercial and experimental products as supplied by A. SCHULMAN at the date of issue. Since conditions of use are outside A. SCHULMAN's control, A. SCHULMAN makes no warranties, express or implied, and assumes no liability in connection with any use of this information.
