- **USA** FDA TITLE 21, EDITION 2003, CFR 177.1350, 178.2010.

The products, ethylene and vinyl acetate (SML=12mg/kg) copolymers, contain an additive with restriction. Each user, according to the legal requirement, has to ascertain that materials and articles must be manufactured in compliance with good manufacturing practice so that, under their normal or foreseeable conditions of use, they do not transfer their constituents to foodstuffs in such an amount to be dangerous for human health and/or include an unacceptable change in the composition of the foodstuffs or a deterioration in the organoleptic properties. Furthermore, migration or extraction tests must be performed on the final item, either by transformer or user, according to the expected employment conditions.

This declaration is valid three years and substitutes those before issued.
