- **UE** DIRECTIVE 2002/72/EC AS AMENDED
- **USA** NOT ALLOWED.

The product contains an additive with restriction.

Each user, according to the legal requirement, has to ascertain that materials and articles must be manufactured in compliance with good manufacturing practice so that, under their normal or foreseeable conditions of use, they do not transfer their constituents to foodstuffs in such an amount to be dangerous for human health and/or include an unacceptable change in the composition of the foodstuffs or a deterioration in the organoleptic properties. Furthermore, migration or extraction tests must be performed on the final item, either by transformer or user, according to the expected employment conditions.

The test of global migration is especially critical for fatty food.

This declaration is valid three years and cancels any previous version.
